

This is a detailed celestial map of the Northern Hemisphere, showing constellations, stars, and a grid of right ascension and declination lines. The map is circular, with the North Pole at the center. Constellations are labeled in Latin, and stars are marked with dots of varying sizes. A prominent blue line, likely representing the ecliptic, runs diagonally across the map. The map is bordered by a circular scale with degree markings.

Coordinates: JD 1,771,298 (137 CE)
